

Vabilo k sodelovanju pri projektu

Model United Nations (MUN)

Opis projekta (v angleščini):

Model UN is a popular activity for those interested in learning more about how the UN operates. Hundreds of thousands of students worldwide take part every year at all educational levels. Many of today's leaders in law, government, business and the arts – including at the UN itself – participated in Model UN as student.

Why Start a Model UN Society? Develop the organisational and communication skills of students, develop team building and cooperation among the student body, prepare for university – you will engage in research, debate and critical thinking, prepare students for the skills required at university and in professions – in every career you need to be able to present your ideas in a thoughtful manner based on evidence.

How Can the Work of the UN help students through the MUN? Empowers young people and gives them the tools to succeed and enjoy their human rights. The Model UN programme teaches young people about how the UN operates - through peacekeeping in conflict zones or aid and other solutions. There are Model UN associations in almost every member nation. By setting up your own MUN Society, you get a flavour of what the UN can achieve and the issues that are discussed today at the UN General Assembly and in committees.
